“With our long-term view on business building and our strong financial position, we are firmly focused on supporting our most promising companies through this downturn, and on continuously taking stock of the investment opportunities emerging in the prevailing market environment. With this said, the correction in the economic environment is likely to have a negative impact on those of our companies that are less resilient.”

Georgi Ganev
CEO of Kinnevik

HIGHLIGHTS IN THE QUARTER

Key Events

- We made a follow-on investment in **Budbee**, valuing the company at SEK 7.3bn, supporting its continued strong organic and profitable growth. We also participated in **Mathem**'s funding round valuing the company at SEK 2.3bn, in line with our first quarter 2022 valuation
- We divested 27% of our shareholding in **Tele2** for SEK 6.0bn, providing us with additional financial strength at a time of market uncertainty, ensuring we have a net cash runway through 2024, and allowing us flexibility to time our capital deployment
- We published Kinnevik's inaugural **Climate Progress Report** to follow up on our climate targets for the portfolio. Between 2020 and 2021, the emissions-reporting companies in Kinnevik's portfolio have decreased their emissions intensity by 11%, reaching our annual target of 7% by a wide margin

Investment Management Activities

- **We invested a more modest SEK 0.5bn** during the quarter, reflective of the current funding environment, of which SEK 155m into Mathem and SEK 115m into Budbee
- For the first half of 2022, we invested **SEK 2.1bn in aggregate**

Financial Position

- **NAV of SEK 61.1bn** (SEK 218 per share), down SEK 6.7bn or 10% in the quarter and SEK 11.3bn or 16% year-to-date
- **Net cash position of SEK 13.6bn**, including the proceeds from our Tele2 sell-down and received dividends, corresponding to 28% of portfolio value by quarter-end

13.6bn
Kinnevik's net cash position (SEK)

Kinnevik's ambition is to be Europe's leading listed growth investor, and we back the best digital companies for a reimagined everyday and to deliver significant returns. We understand complex and fast-changing consumer behaviours, and have a strong and expanding portfolio in healthtech, consumer services, foodtech and fintech. As a long-term investor, we strongly believe that investing in sustainable business models and diverse teams will bring the greatest returns for shareholders. We back our companies at every stage of their journey and invest in Europe, with a focus on the Nordics, and in the US. Kinnevik was founded in 1936 by the Stenbeck, Klingspor and von Horn families. Kinnevik's shares are listed on Nasdaq Stockholm's list for large cap companies under the ticker codes KINV A and KINV B.

CHIEF EXECUTIVE'S REVIEW

Dear Shareholders, as we close out the first half of 2022, our environment is radically different to where we were one year ago. The aftermath of the covid pandemic with inflationary pressure, challenged supply chains and rising interest rates, exacerbated by the war in Europe, has put strong pressure on the valuations in our pocket of growth equity markets. Whereas we last year highlighted that multiple expansion was supporting our net asset value, we now face a significant reversal of that trend. With our long-term view on business building and our strong financial position, we are firmly focused on supporting our most promising companies through this downturn, and on continuously taking stock of the investment opportunities emerging in the prevailing market environment. With this said, the correction in the economic environment is likely to have a negative impact on those of our companies that are less resilient.

Kinnevik's Q2 Results

Our Net Asset Value amounted to SEK 61.1bn or SEK 218 per share at the end of the second quarter of 2022, down by SEK 6.7bn or 10 percent from where we ended the first quarter.

The downward valuation trend faced by public growth assets during the first quarter continued without abatement during the second quarter. The pandemic winners are typically facing the most valuation pressure, as evident in the stock market's valuations of companies in sectors such as non-specialized virtual health, e-commerce, and streaming services. We continue to seek to reflect changes in valuation levels of publicly listed peers when valuing our unlisted businesses. On average, we have decreased our valuation of each individual company by around 30 percent this quarter. Due to a handful of transactions undertaken in this valuation environment, significant currency tailwinds, and the effect of customary downside protection provisions in some of our investments, the reported fair value of our unlisted portfolio decreased by a more muted 7 percent. You find a detailed description of the current valuations of our unlisted investments in Note 4.

In May, we divested around a quarter of our shares in Tele2

for a total consideration of SEK 6.0bn which, together with dividends received from Tele2, takes our net cash balance at the end of the second quarter to SEK 13.6bn. The additional financial strength secured at a time of market uncertainty not only ensures that we have a net cash runway through 2024 at our current pace of investment of around SEK 5bn per year. It also provides us with increased flexibility to time our deployment of capital, and ability to act on attractive opportunities as they emerge.

The Importance of the S-Curve

It seems clear that the market downturn will be more long-lasting than perhaps expected at the beginning of the year. At Kinnevik, we take comfort in the fact that we have a strong balance sheet and are able to take a more long-term view than most other investors. We are also pleased that many of our largest and most important investments took advantage of the benign market conditions of the past to extend their runways. In aggregate, our companies raised more than SEK 50bn in fresh capital last year, making many of them less vulnerable to the medium-term fundraising market. We estimate that investees corresponding to almost 50 percent

of our unlisted fair value have runways extending into 2024 and beyond, and less than 10 percent have cash runway that ends during 2022. With this in mind, we are continuously assessing how the weaker macro outlook could affect each of our companies individually, and refrain from issuing generic and dogmatic advice on how they should value growth versus profitability in the short term. The general ebb of capital will undoubtedly have a more fundamental impact on many of our businesses that have shorter runways, and there will be cases where we opt to realize losses of capital instead of financing businesses that we do not believe have a high risk-adjusted potential to be long-term successful.

What also helps us absorb the impact of deteriorating market conditions are the strides we have made in building a portfolio of a balanced set of companies spread across the typical business S-curve in terms of growth and time to cash flow profitability. This is not only a result of investing at different stages of maturity, but also by financing the growth of many of our younger businesses through consistent follow-on investments.

At the right-hand side of our portfolio's maturity spectrum, we find e.g. Jobandtalent, the workforce marketplace that matches workers with temporary employment. The company was growing revenues at 130 percent annually while being profitable at an EBITDA level when we invested at the end of last year. Since then, the company has continued to perform strongly and expects to double revenues also in 2022.

At the other end of the curve, we find Omnipresent, a more recent investment in an earlier stage of growth. Omnipresent provides client-focused, tech-enabled business solutions combined with personalized expertise to support hiring people globally in more than 160 countries. When Kinnevik led the round in March of this year, it was on the back of Omnipresent growing revenues by 25x during 2021. While the new market environment clearly has an impact on Omnipresent, it also provides opportunities. Many companies

are now even more focused at hiring in different jurisdictions to further optimize their cost base, and with valuations resetting across companies in the venture and growth ecosystem, there is a lot of movement of talent taking place.

We expect Omnipresent to move along the S-curve over time, just as many of our successful investments have done before them. One example of this is Budbee, where we invested early on and have kept investing more capital as the company has progressed along the curve. Since our first investment in 2018, Budbee has grown revenue by over 30x to SEK 835m in 2021, while reaching profitability in their underlying operations. In addition to last mile deliveries directly to the home, Budbee has contracted 5,000 pick-up boxes in its five markets supporting their strong growth. Budbee is an example of how high-quality companies remain able to raise capital at attractive terms even as markets have softened, with the company completing a funding round of SEK 400m during the quarter valuing the company at SEK 7.3bn. To date, our investment in Budbee has generated a return of 4.4x times our aggregate invested capital, and 11x our first investment in 2018.

With our diverse set of companies led by strong founders, we also have great opportunities to draw on the experiences from how some of our portfolio companies have coped with rapidly changing market conditions. One such example is Avi Meir, the founder and CEO of TravelPerk, whose strong leadership and swift actions helped TravelPerk not only survive when the covid pandemic hit, but to thrive as travel returned. Read how he did it on page 15.

Assessing New Investment Opportunities

The current market environment will not only cause some of our companies to fall off their growth trajectory, or to fail completely. It will also cause attractive investment opportunities to emerge both in our existing portfolio and in new companies. Our pipeline remains vibrant, with interesting

opportunities in all focus sectors. In the first six months of 2022, we have deployed SEK 2.1bn in total, with a 37/63 per cent split between existing and new companies. We see a marked difference in the pace of new funding rounds, and we believe that this market climate benefits our ability to identify, source and pursue long-term attractive investment opportunities. For the full year, we still expect to invest around SEK 5bn, and that this capital is split fairly even between follow-on investments and new investments, and we remain ready and able to deploy even more capital should attractive opportunities arise during the second half of 2022.

Building Sustainable Businesses

In June, we published our first Climate Progress Report to follow-up on the fulfilment of our annual greenhouse gas emissions intensity target for Kinnevik's portfolio. Between 2020 and 2021, the emissions-reporting companies in Kinnevik's portfolio have decreased their emissions intensity by 11 percent, thus achieving our annual target of 7 percent.

The current market environment will cause attractive investment opportunities to emerge both in our existing portfolio and in new companies. Our pipeline remains vibrant, with interesting opportunities in all focus sectors.

Climate change is one of the greatest global environmental and economic challenges of our time and we have a unique position to influence our companies to become sustainability leaders and align with a low-carbon future. We are proud of the progress made in our portfolio companies and impressed by their ability to scale rapidly while decreasing greenhouse gas emission intensity.

Concluding Remarks

The current market environment is driving a wedge between companies that rose with the tide during the pandemic era and companies that truly have the potential to be long-term successful irrespective of the macroeconomic environment. This is the case for the venture and growth market in general, and it is the case for us at Kinnevik. We need to be prepared if the pressure on valuations continues, or intensifies further, making fundraising even more difficult.

While we remain humble in the face of the current market environment, we are confident that over the long-term we will come out of this downturn stronger. For two reasons. Firstly, we believe we have been disciplined allocators of capital and have elected to pass on, or scale down, investments at lofty valuations during 2020 and 2021. Secondly, we believe our permanent capital base and our strong financial position gives us the tools we need to capture as much value as possible during a time when other investors' horizons contract. Growth investing is not easy and requires a level of patience and composure that few investors can stomach. It is at these times of difficulties that the advantage and distinction of our long-term perspective is the most valuable. To all our shareholders that continue to place your trust with us, we are confident your endurance will be rewarded.

How does a travel management company not just survive, but thrive, in a global pandemic?

We spoke to **Avi Meir**, founder and CEO of TravelPerk about how he steered TravelPerk through the covid crisis

Avi, what was your first reaction when covid hit the world in March of 2020?

In March 2020 we were growing 3x year-on-year. Three weeks later we had a negative revenue day. Negative. Revenue. We needed

to return more money than what we had collected that day. Overnight, we had to acknowledge that our world had changed completely - we went to war mode.

The Leadership Team and I met on a Sunday afternoon and simply deleted the document with our yearly goals. We stood up by the whiteboard and wrote down three new priorities: 1) survive, 2) emerge strong, and 3) turn lemons into lemonade.

Tell us how you made sure the company survived the crisis

We needed to make sure we had enough cash to outlive the crisis. All replaceable or luxury expenses were immediately cut to zero - rent, fruits & coffee, etc. We needed to be brutal and get rid of everything that we could buy or rent again in the future.

The one thing that we didn't cut was people. It took a lot of effort to build our amazing team, and I wasn't going to let it all go to waste. People are not interchangeable, each of us is unique. So, we fought hard to save every job we could and avoided layoffs.

We had 300 sales representatives and travel agents who had no work to do as no one was traveling in April 2020. We did a very aggressive performance review across the organization covering all roles, which enabled us to cut costs while keeping the best people - even in roles that had no work to do at the time.

As a side effect is that my team now knows that I did everything in my power to keep

their jobs, and that our values are not mere virtue - we stick to them even when things get tough. Imagine how much stronger we are as a team now because of this.

In addition to cutting costs by over 40 percent, we also raised a convertible note from existing investors. I didn't negotiate the terms too hard, we needed cash and I wasn't going to be short-sighted and fight for paper valuation at the expense of cash in the bank.

Two years on, we now know that TravelPerk not only survived but emerged strong - how did you do it?

We always knew that the meetings that matter happen in person, and that people will go back to wanting to connect in real life. So, we decided to not stop selling but kept adding customers as fast as we could, even though no one was traveling. We set up their accounts, did demos, and crossed our fingers that one day they would use the product.

I used to tell my team that we're like a real estate company buying buildings to rent in the future. We know that tenants will want to live there, but right now we can't rent the assets. Future revenue was our north star metric (we called it Travel Budget Under Management).

In addition to adding customers, we also used the time to double down on our product. We hired more people in product and engineering and increased our product velocity. Quiet times have their advantages, and we used it to build for the future.

As a result of our resolve to emerge strong from the crisis, we have tripled our margins, kept building a great product, added more customers than ever, and increased future revenue.

Finally, how did you manage to turn lemons into lemonade?

Crisis means opportunity. Once we had ensured we would survive and emerge strong, we lifted our eyes from the immediate, and looked for these strategic and rare opportunities that the crisis enabled for us. Firstly, crisis means lower valuations and we acquired four great companies at a discount during this period. Secondly, traveling during Covid was really complicated with all local rules and regulations, so we built a Travel Restrictions API and sold to third parties. Thirdly, as we saw remote work and increasingly international team as a trend that was likely to last beyond the pandemic, we built an offsite planning tool to enable people to meet in person a few times per year.

So where is TravelPerk today?

I'm fortunate enough to have a great team and fantastic investors that supported us throughout the crisis. Today, our revenue is 10x compared to before the pandemic, our margins are 3x, the team is stronger than ever, and the product is in a category of its own.

KINNEVIK HAS PUBLISHED ITS INAUGURAL CLIMATE PROGRESS REPORT

“Climate change is one of the greatest global environmental and economic challenges of our time and we have a unique position to influence our companies to become sustainability leaders and to align with a low-carbon future. I am proud of the progress made in our portfolio companies and impressed by their ability to scale rapidly while decreasing greenhouse gas emission intensity. With this report we also want to increase transparency towards Kinnevik’s stakeholders and drive the development in our sector with regards to emission disclosure and target follow-up.”

Georgi Ganev, CEO of Kinnevik

11%

Between 2020 and 2021, the emissions-reporting companies in Kinnevik’s portfolio have decreased their emissions intensity by 11%, thus achieving our annual target of 7%

50%

Our long-term target is a 50% reduction in greenhouse gas emission intensity in Kinnevik’s portfolio by 2030 compared to 2020

Highlights from the Climate Progress Report 2021

- Kinnevik set two climate targets in May 2020, a net zero target for our operations excluding the portfolio and a target to achieve 50% reduction in greenhouse gas emission intensity in Kinnevik’s portfolio by 2030 compared to 2020. In 2021, the portfolio climate target was integrated into our Sustainability-Linked Financing Framework and translated into an annual reduction target, namely, to achieve a reduction in greenhouse gas emissions intensity in the portfolio by 7% annually, until 2030
- The objective of our inaugural Climate Progress Report is to follow-up on the fulfilment of Kinnevik’s annual intensity reduction target and report on the performance against the Climate Sustainability Performance Target of our outstanding Sustainability Linked Bonds
- Between 2020 and 2021, the six companies in Kinnevik’s portfolio reporting emissions have on aggregate and on a value-weighted basis, **decreased their emissions intensity by 11%, thus achieving our target for 2021**
- In addition to the main objective to follow-up on our climate target for the portfolio, the Climate Progress Report also includes an overview of the total emissions from Kinnevik’s portfolio. The overview includes the actual carbon dioxide equivalents of our emissions-reporting companies as well as an estimate of the scope 1 and 2 emissions from our largest non-reporting portfolio companies

The full Climate Progress Report 2021 is available on www.kinnevik.com.

Capital Allocation Framework

Over 2019-23, Kinnevik is aiming to systematically invest its capital under a capital allocation framework which entails:

- Investing one-third of our capital into first round investments, and two-thirds of our capital into follow-on investments in the high-performing companies of our growth portfolio, on average per year.
- Adding one or two international, later-stage companies, and one or two Nordic earlier-stage companies on average per year.
- Distributing our capital evenly across our focus sectors.
- Aiming to accrete 15-25 percent ownership stakes.
- Targeting a portfolio of 30 companies, with a more even distribution of value across investments and sectors, as well as levels of risk and stages of maturity.

During the second quarter, reflective of the current funding environment, we invested a more modest SEK 0.5bn. Among the largest investments were a follow-on investment of SEK 115m in Budbee as part of a SEK 400m funding round that valued the company at SEK 7.3bn. We also participated with SEK 155m in Mathem's SEK 500m funding round valuing the company at SEK 2.3bn, in line with our first quarter 2022 valuation.

In May, we divested around a quarter of our shares in Tele2 for a total consideration of SEK 6.0bn which, together with dividends received from Tele2, takes our net cash balance at the end of the second quarter to SEK 13.6bn. The additional financial strength secured at a time of market uncertainty ensures that we have a net cash runway through 2024 at our current pace of investment.

In the first six months of 2022, we have deployed SEK 2.1bn in total, with a 37/63 percent split between existing and new companies. For the full year, we still expect to invest around SEK 5bn, and that this capital is split fairly even between follow-on investments and new investments, and we remain ready and able to deploy even more capital should attractive opportunities arise during the second half of 2022.

CAPITAL STRUCTURE

As at 30 June 2022, Kinnevik had a net cash position of SEK 13.6bn, corresponding to 28 percent of portfolio value. This net cash position was mainly made up of SEK 17.2bn in cash and short-term investments, less SEK 3.5bn in senior unsecured bonds with a remaining tenor exceeding 12 months and 0.1bn in debt for unpaid investments.

FINANCIAL TARGETS

Attractive Returns

Kinnevik's objective is to generate a long term total return to our shareholders in excess of our cost of capital. We aim to deliver an annual total shareholder return of 12-15 percent over the business cycle.

Low Leverage

Given the nature of Kinnevik's investments, our goal is to carry low leverage, not exceeding 10 percent of portfolio value.

Shareholder Remuneration Policy

Kinnevik generates shareholder returns primarily through capital appreciation, and will seek to return excess capital generated by its investments to shareholders through extra dividends.

| Average number of shares before dilution | | 279 360 120 | 277 871 501 | 279 311 820 | 277 839 346 | 278 177 851 |
| Average number of shares after dilution | | 279 360 120 | 277 871 501 | 279 311 820 | 277 839 346 | 278 177 851 |

Consolidated Earnings for the Second Quarter

The change in fair value of financial assets including dividends received amounted to a loss of SEK 6,624m (profit of 12,576) for the second quarter of which a loss of SEK 4,461m (profit of 8,753) was related to listed holdings and a loss of SEK 2,163m (profit of 3,823) was related to unlisted holdings. See note 4 and 5 for further details.

The increased financial net is mainly attributable to revaluation of SWAP agreements partly offset by decreased value of short term investments in Money Market funds.

Consolidated Earnings for the First Six Months of the Year

The change in fair value of financial assets including dividends received amounted to a loss of SEK 11,213m (profit of 18,712) for the first six months of the year of which a loss of SEK 5,771m (profit of 8,312) was related to listed holdings and a loss of SEK 5,442m (profit of 10,399) was related to unlisted holdings. See note 4 and 5 for further details.

The increased financial net is mainly attributable to revaluation of SWAP agreements partly offset by decreased value of short term investments in Money Market funds.

NOTES FOR THE GROUP

Note 1 Accounting Principles

The consolidated financial statements are prepared in accordance with the International Financial Reporting Standards (IFRS), as adopted by the EU. This report was prepared in accordance with the Annual Accounts Act and IAS 34, Interim Financial Reporting. Information in accordance with IAS 34, Interim Financial Reporting is provided in the notes as well as in other places in the interim report.

The accounting principles are the same as described in the 2021 Annual Report.

Note 2 Risk Management

Kinnevik's management of financial risks is centralized within Kinnevik's finance function and is conducted based on a Finance Policy established by the Board of Directors. The policy is reviewed continuously by the finance function and updated when appropriate in discussion with the Audit & Sustainability Committee and as approved by the Board of Directors. Kinnevik has a model for risk management that aims to identify, control and reduce risks. The output of the model is reported to Audit & Sustainability Committee and Board of Directors on a regular basis. Kinnevik is mainly exposed to financial risks in respect of:

- Valuation risk, in relation to negative changes in the value of the portfolio
- Liquidity and financing risk, in relation to increased cost of financing, and difficulties in refinancing maturing loans and facilities, ultimately leading to payment obligations not being met
- Foreign exchange rate risk, in relation to transaction and translation currency exposure
- Interest rate risk, having an adverse impact on financing costs

For a more detailed description of Kinnevik's risks and uncertainties, as well as risk management, refer to Note 17 for the Group in the 2021 Annual Report.

Note 3 Related Party Transactions

Related party transactions for the period are of the same character as the transactions described in the 2021 Annual Report.

Note 4 Financial Assets Accounted at Fair Value Through Profit & Loss

OUR FRAMEWORK AND PRINCIPLES

In assessing the fair value of our unlisted investments, we apply IFRS 13 and the International Private Equity and Venture Capital Valuation Guidelines, whereunder we make a collective assessment to establish the valuation methods and points of reference that are suitable and relevant in determining the fair value of each of our unlisted investments. Valuations in recent transactions are not applied as a valuation method, but typically provides important points of reference for our valuations. When applicable, consideration is taken to preferential rights such as liquidation preferences to proceeds in a sale or listing of a business. Valuation methods include revenue, GMV, and profit multiples, with consideration to differences in size, growth, profitability and cost of equity capital. We also consider the strength of a company's financial position, cash runway, and the funding environment.

The valuation process is led independently from the investment team. Accuracy and reliability of financial information is ensured through continuous contacts with investee management teams and regular reviews of their financial and operational reporting. Information and opinions on applicable valuation methods are obtained periodically from investment managers and well-renowned investment banks and audit firms. The valuations are approved by Kinnevik's CFO and CEO after which a proposal is presented and discussed with the Audit & Sustainability Committee and Kinnevik's external auditors. After their scrutiny and potential adjustments, the valuations are approved by the Audit & Sustainability Committee and included in Kinnevik's financial reports.

When establishing the fair value of other financial instruments, methods assumed to provide the best estimation of fair value are used. For assets and liabilities maturing within one year, a nominal value adjusted for interest payments and premiums is assumed to provide a good approximation of fair value.

Information in this note is provided per class of financial instruments that are valued at fair value in the balance sheet, distributed in the levels stated below:

| Category | Kinnevik Unlisted Investee Averages | | | Peer Group Averages | | |
|----------------------------|-------------------------------------|-------------------|---------------------|---------------------|-------------------|----------------|
| | 2021 Revenue Growth | 2021 Gross Margin | NTM EV/Revenue | 2021 Revenue Growth | 2021 Gross Margin | NTM EV/Revenue |
| • Value-Based Care | +105-125% | 5-15% | 3.0-4.5x | +55% | 25% | 2.0x |
| • Virtual Care | +215-235% | 35-55% | 8.0-12.0x | +80% | 45% | 1.5x |
| • Platforms & Marketplaces | +40-60% / +140-160% | 30-40% / 60-80% | 1.5-2.5x / 5.0-7.0x | +40% / 45% | 40% / 80% | 1.0x / 4.0x |
| • Software | +130-150% | 60-80% | 10.0-25.0x | +35% | 80% | 5.0x |
| • Consumer Finance | +30-50% | 50-70% | 5.0-7.0x | +40% | 55% | 5.5x |

Note: Kinnevik unlisted investee averages are weighted by fair value.

Level 1: Fair value established based on listed prices in an active market for the same instrument.

Level 2: Fair value established based on valuation techniques with observable market data, either directly (as a price) or indirectly (derived from a price) and not included in Level 1.

Level 3: Fair value established using valuation techniques, with significant input from data that is not observable in the market.

For companies that are valued based on multiples, an increase in the multiple by 10% would have increased the assessed fair value by SEK 2,016m. Similarly, a decrease in the multiple by 10% would have decreased the assessed fair value by SEK 2,025m.

A NEW VALUATION ENVIRONMENT

In the second quarter of 2022, the downward valuation pressures faced by public growth assets during the first quarter continued without abatement. Concurrently, many companies also faced sidewinds from speculation around post-pandemic consumer behaviour, as evident in the stock market's valuations of companies in sectors such as non-specialized virtual health, e-commerce, and streaming services. Changing expectations of inflation and interest rates continue to be a significant driver of valuation multiples, in particular for companies such as ours where cash flow profitability is typically still some years out. Going forward, another external force driving changes in valuations may be to what extent the

business cycle contracts and the economic activity in our key markets decline, affecting demand for our companies' products and services.

Investment activity in private venture and growth markets has slowed down relative to the hectic 2021, and the IPO market has effectively closed. This is leading to fewer transactions and less price discovery occurring in private markets during the first half of 2022 that could otherwise aid the calibration of our valuation models. Even so, we see clear signs of private markets reconciling with the material derating in public markets and that this correction is bearing a more significant impact on later-stage companies relative to earlier-stage companies. Still, companies regarded as leading businesses in their respective sector or business area are typically facing fewer and less intense challenges when raising capital relative to the median business, and this differential has widened during the first half of 2022. These parameters, paired together with our companies' operational performance, financial strength and reliance on the near-term funding climate, have been taken into consideration when valuing our unlisted companies. Growth remains a distinct influence on valuation multiples in public markets, and we seek to reflect a corresponding differential when valuing our companies in relation to slower-growing public peers.

MULTIPLE CONTRACTION

We continue to seek to reflect the quarter-end valuation levels of publicly listed peers when valuing our unlisted businesses, typically allowing

peer group multiple contraction flow through our valuations without adjustment. We also increasingly focus on multiples of expected revenue over the next twelve months (“NTM”) to deemphasize the direct weight of importance placed on more longer-term projections. A focus on NTM forecasts when reflecting changes in multiples of listed peers means that the valuations of some of our companies demonstrating high growth and low cash burn are more resilient than that of the average listed peer, and more in line with the stronger constituents of the respective peer group.

In the table to the right, we show the average multiple contraction in valuations that are not underpinned by transactions that took place in the current valuation environment, during or shortly after the second quarter of 2022. During the quarter, the average NTM revenue multiple contraction in our unlisted portfolio was 34 percent, around 5 percentage points more moderate than the average peer. For the first half of 2022 the multiple contraction in our unlisted portfolio was 43 percent, around 12 percentage points more moderate than the average peer. This moderation primarily stems from our Software investments. Here, the peer group’s average multiple contraction has been weighed down by the reversal of trends in sectors like e-commerce. This stands in stark contrast to our two largest Software investments, Pleo and TravelPerk, that are enjoying significant tailwinds as pandemic restrictions have eased and corporate travel and expense volumes have begun to rebound materially. This, we believe, warrants a multiple compression more in line with the peer group’s more resilient quartile rather than its average compression.

LIQUIDATION PREFERENCES

Kinnevik’s unlisted investee companies adopt different financing structures and may at times issue shares with liquidation preference rights. Liquidation preferences determine how value is allocated between shareholders in e.g. a sale or listing of a business, and typically means that holders of preference shares receive proceeds in priority over holders of common shares in the event of a sale or public offering. In general, these liquidation preferences have the result that Kinnevik recoups its investment capital if the valuation of the company exceeds the amount of capital it has raised in aggregate. Due to liquidation preferences, the allocation of proceeds between shareholders in a liquidity event may

Value Drivers in the Unlisted Portfolio

| <i>Including Q2 2022 Transactions</i> | <i>-30%</i> | | <i>-40%</i> | |

become increasingly complex over time, and Kinnevik's share of proceeds may significantly deviate from its percentage ownership of the investee company's issued equity. Accordingly, an increase or decrease in value of an investee company's equity where liquidation preferences are applicable may result in a disproportionate increase or decrease in the fair value of Kinnevik's shareholding. Liquidation preferences may also entail that the fair value of Kinnevik's investment remains unchanged in spite of the assessed value of a particular investee company as a whole changing materially. An unlisted investee company's transition into a publicly listed company may also affect the value of Kinnevik's shareholding due to the dismantling or triggering of such provisions.

Liquidation preferences, as described above, naturally become more relevant during a market drawdown such as the one we are experiencing during 2022. The majority of our investments carry these types of downside protection provisions, and the effect of these provisions become the most pronounced in companies where we have only invested in the latest financing round. In these investments, the fair value of our investment may remain unchanged in spite of material downwards adjustments to the underlying valuation of each relevant company. At the end of the quarter, the aggregate fair value impact from liquidation preferences amounted to approximately SEK 2.4bn and was primarily centred to a handful of new investments made in 2021 and early 2022. The same figure amounted to around SEK 0.5bn in the previous quarter, and the difference was negligible at the end of 2021. As such, the incremental effect in the second quarter amounts to SEK 1.9bn, and SEK 2.4bn in the first half of 2022.

This value difference means that if Kinnevik's shareholdings would not enjoy said liquidation preferences, the fair value of the unlisted portfolio would be SEK 2.4bn lower. In other terms, the underlying value of Kinnevik's investments in these companies needs to increase by SEK 2.4bn, or around 40 percent on average, before the accrual of an on-paper return on investment. This notwithstanding, the fair values included in Kinnevik's net asset value statement correspond to the proceeds Kinnevik is entitled to receive in the event of a sale of each investment at the assessed underlying value of each company.

AGGREGATE VALUE CHANGES AND DRIVERS

On average, the valuation of each of our companies decreased by more than 20 percent in the second quarter of 2022, and by more than 30 percent during the first half of 2022. Excluding the companies where our valuations are underpinned by transactions that took place during or shortly after the second quarter, the average decrease exceeded 30 percent in the second quarter and amounted to almost 50 percent in the first half of 2022.

Similar to the previous quarter, the continued material derating in public growth equities used as valuation benchmarks for our private businesses was the single-most important driver of the downwards value change in our unlisted portfolio during the quarter. Indicatively, multiple contraction had a materially negative effect of SEK 8.4bn on our valuations in the quarter. Excluding the valuations that are underpinned by arms-length transactions in the quarter and thereby concluded in the current valuation environment, the effect of multiple contraction was closer to SEK 9bn. Revenue growth offset some of the impact of compressing valuation levels with a positive contribution of around SEK 4.8bn.

The Swedish krona weakened materially in the second quarter, in particular against the dollar, in aggregate contributing to a positive effect on the valuations of our unlisted investments of around SEK 1.7bn. As outlined above, the incremental positive effect of liquidation preferences in the quarter amounted to SEK 1.9bn. The aggregate positive effect from these two factors of SEK 3.6bn is what bridges the material downward reassessments of the underlying valuations of our unlisted portfolio to the more modest 7 percent write-down outlined in our net asset value statement. For the first half year, the positive effect of currency movements amounted to SEK 2.2bn and that of liquidation preferences (in constant currencies) amounted to SEK 2.2bn, or SEK 4.4bn in total.

OUR INVESTEEES RELATIVE TO THEIR VALUATION PEER GROUPS

In our interim report for the first quarter of 2022, we rearranged our NAV statement. Our aim with the new categorization is to group our private investments in a more refined way, sorting them with their shared publicly listed comparable companies in mind. This, we believe, together with the aggregated financial metrics we are now providing for each category,

is a step forward in terms of transparency of the performance and our assessed valuations of our unlisted assets. The table on page 29 outlining these financial metrics for our new NAV categories and their peer groups should be read together with the qualitative commentary provided on the following pages. Please also note that the averages for Kinnevik's unlisted investees are weighted by fair value and provided as indicative ranges. For the categories where our companies are growing at materially higher rates than the peer group average, our valuation multiples are typically at a premium to the peer group's average. This spread is calibrated by valuations ascribed our businesses in arms-length transactions and by the correlation between growth and valuation multiples in public markets. The average premium is considerably smaller when benchmarking our valuations against more richly valued constituents in each relevant peer group. Premiums to the peer group average multiple narrow over time as our companies continue to outpace the growth of its valuation benchmarks. When relating our assessed valuations to financial metrics a year further out than the next twelve months, virtually all of our valuations are within the ranges of their respective peer group.

VALUE-BASED CARE

Value-Based Care consists of care delivery companies that take risk on, and are paid on the basis of, patient health outcomes. Our larger investments in this category – Cityblock and VillageMD – are benchmarked against a peer set of businesses in various ways delivering or driving a shift towards value-based care, such as Oak Street Health (OSH), Agilon Health (AGL), and Signify Health (SGFY). On average, the companies in the peer set grew revenue by 55 percent in 2021 with gross margins of 25 percent, and trade at around 2x NTM revenues. Our businesses grew twice as fast with slightly slimmer gross margins and are valued at around 3-4.5x NTM revenues on average.

The fair value of Kinnevik's 8 percent in **Cityblock** amounts to SEK 2,959m, down some 12 percent in the quarter. The NTM revenue multiple has been compressed in line with the peer group average of around 35 percent, and remains at an unchanged premium to this average considering Cityblock's revenue growth significantly outpacing the listed benchmarks while proving sustainable gross margins in its more

established cohorts. Thanks to continued strong underlying performance the write-down becomes more muted than these 35 percent, and the valuation also benefits materially from the weakening Swedish krona. Looking an additional six months out, on a 2023 revenue multiple basis, the valuation is increasingly in line or at a deeper discount to the more richly valued constituents of the peer group.

The fair value of Kinnevik's 4 percent shareholding in **VillageMD** amounts to SEK 3,684m, down some 14 percent from last quarter's level, which in turn was 11 percent below the SEK fair value underpinned by the transaction with Walgreens Boots Alliance during the fourth quarter of 2021. As for Cityblock, the NTM revenue multiple is compressed in line with the peer group average of 35 percent, and VillageMD remains valued at an unchanged premium to this average NTM revenue multiple. Also similar to Cityblock, the valuation is increasingly in line or at a deeper discount to the more richly valued constituents of the peer group on a 2023 revenue basis, and benefits materially from a weakening Swedish krona. The premium to the peer group average on an NTM revenue basis is reflective of the company's structural advantage and stronger growth trajectory stemming from the unique partnership with Walgreens Boots Alliance.

VIRTUAL CARE

Virtual Care consists of healthcare businesses that deliver general or specialized care services through virtual channels, and leverage technology such as AI to improve the care outcomes for their users. We benchmark these businesses against a peer set of listed telemedicine companies, both generalists such as Teladoc (TDOC) and Amwell (AMWL), but also more vertical players such as Hims & Hers (HIMS) and Lifespan (LFST). The companies in the peer set grew revenues by around 80 percent on average in 2021 with gross margins of 40-50 percent. In 2022, the average expected peer growth rate is closer to 35 percent, and the peer group trades at an average 1.5x NTM revenues. Our businesses are growing revenues at a materially higher rate with comparable gross margins, and are better positioned for long-term growth compared to their more mature listed peers. Virtual Care is nascent in itself and the current cohort of listed peers largely consists of companies facing structural challenges that our

unlisted companies aim to disrupt. As a consequence, our Virtual Care companies are valued at a material premium to the peer group, at around 8-12x NTM revenues on average, more in line with SaaS benchmarks with similar financial profiles to those of our unlisted virtual health businesses.

The fair value of Kinnevik's 5 percent shareholding in **Spring Health** amounts to SEK 1,025m. The carrying value remains in line with the capital we invested into the company when it raised capital during the third quarter of 2021, but appreciates due to the weakening Swedish krona. The underlying valuation of the company has been adjusted downwards to reflect the approximate 40 percent compression of the listed peer group's average NTM revenue multiple in the quarter, but due to liquidation preferences the fair value of our shareholding remains unchanged in dollar terms. Also after this downwards adjustment, the valuation remains at a significant but unchanged premium to the forward-looking multiples of a peer group of telemedicine operators, justified by Spring Health's materially higher growth rate. In relation to the NTM revenue multiples of SaaS businesses with a similar financial profile as Spring Health's, our valuation is at a double-digit discount.

PLATFORMS & MARKETPLACES

Our Platforms and Marketplace businesses form the most diverse group of investments in the NAV categorization introduced last quarter. The group spans online grocer businesses such as Mathem and Oda with mid-30s gross margins, to pure marketplaces like Jobdantent with gross margins more than twice as high. Accordingly, these businesses are valued against different peer sets. The average peer group valuation level is around 1x NTM revenues for lower-margin e-commerce peers and around 4x NTM revenues on average for higher margin marketplace peers. Average peer growth rates were typically around 40-45 percent in 2021 in both ends of the margin spectrum. Our Platforms & Marketplaces companies are in general valued in line with, or at narrow premiums to, their respective peer group average. This is reflective of their later stage of maturity, but also of the valuation levels that these businesses have raised capital relative to how their listed peer groups were valued at the time of these transactions.

The fair value of Kinnevik's 28 percent shareholding in **Budbee** amounts

to SEK 1,970m, up 40 percent excluding our SEK 115m investment in the quarter. The valuation is in line with where Budbee raised capital in the second quarter and is based on NTM revenue multiples inferred from a set of logistics technology and mobility businesses such as InPost (INPST.AS), DoorDash (DASH) and Uber (UBER). Budbee's NTM revenue multiple is at a material premium to the peer group average, a peer group which saw significant variance in this quarter's development of valuation multiples - spanning 0 to 70 percent contraction. In relation to the peer group's more richly valued constituents, such as InPost, our valuation is at a significantly more narrow premium. These premiums are reflective of Budbee's materially higher growth rate solidified by the company's proven underlying EBITDA profitability.

The fair value of Kinnevik's 31 percent shareholding in **Mathem** amounts to SEK 854m, which is 40 percent below the valuation at the end of 2021, but in line with last quarter's valuation and the valuation at which Mathem raised new equity capital in the quarter. The valuation is based on revenue multiples of a composite peer group of inventory holding e-commerce retailers and meal kit businesses such as Zalando (ZAL.DE), Boozt (BOOZT.ST) and HelloFresh (HFG.DE), as well as estimates of market valuations of Ocado's (OCDO.L) retail business. The peer group's average NTM revenue multiple contracted by almost 50 percent in the quarter, with the bulk of this contraction occurring ahead of Mathem raising its funding round in mid-May. The assessed valuation implies a multiple of 1x the company's revenues during the last twelve months as at 31 March 2022 (as disclosed on p. 12 but pro forma the acquisition of Mat.se), but naturally takes the forward outlook into account.

The fair value of Kinnevik's 21 percent shareholding in **Oda** amounts to SEK 1,118m, down 25 percent in the quarter. The valuation is based on revenue multiples of the same composite peer group used in valuing Mathem. The decrease in fair value is due to Oda's growth not fully offsetting the material peer multiple contraction in the quarter. The assessed valuation implies a multiple of around 2x the company's revenues during the last twelve months as at 31 March 2022 (as disclosed on p. 12), at a significant premium to the peer group, and clearly takes the forward outlook into account. The multiple declines to a level more in line with key peers looking further out into the future, as Oda is expected to grow

at a significantly higher rate fuelled by its geographical expansion. The valuation also reflects the exceptional operational efficiency of the company's proprietary fulfilment solution.

The fair value of Kinnevik's 11 percent shareholding in **Vivino** amounts to SEK 577m, effectively flat in the quarter save for currency tailwinds. The valuation is mainly based on forward-looking GMV multiples of a peer group of global online marketplaces with high user engagement such as Etsy (ETSY). Our assessed value of the company as a whole is written down in line with the trading of the peer group in the quarter, which has seen its average forward-looking GMV multiple contract by around 35 percent. The valuation remains at an unchanged and relatively material discount to the peer group's average multiple. As our holding benefits from downside protection from the preferential terms of our investment in the company's latest equity fundraise, the fair value of our investment remains largely unchanged.

The fair value of Kinnevik's 5 percent shareholding in **Jobandtalent** amounts to SEK 1,082m, effectively flat in the quarter. The valuation is based on near-term forward-looking revenue multiples of a peer group consisting of human capital-focused businesses such as Fiverr (FVRR) and Upwork (UPWK), with reference also drawn to B2B marketplaces. The peer group's average NTM revenue multiple contracted by around 40 percent in the second quarter, with the company's revenue growth muting the impact of a contracting multiple somewhat. The company remains valued at an unchanged premium to the peer group considering its significantly stronger revenue growth relative to the peer group constituents while maintaining comparable margins. Our holding benefits from downside protection from the preferential terms of our investment in the company's fundraise in the fourth quarter of 2021, supporting an effectively unchanged fair value.

SOFTWARE

Our Software businesses are typically benchmarked against a peer set of SaaS businesses such as Atlassian (TEAM) and Salesforce (CRM), and of more transactional software businesses like Twilio (TWLO) and Shopify (SHOP). The companies in the peer set typically grew revenue at around 35 percent in 2021 and have gross margins of 80 percent, compared to

our businesses which typically are growing more than four times faster with almost comparable gross margins.

The fair value of Kinnevik's 8 percent shareholding in **Cedar** amounts to SEK 2,061m, down around 10 percent in the quarter. The valuation reflects an unchanged premium to the peer group's average NTM revenue multiple, which has contracted by around 30 percent in the quarter. Our fair value is supported upwards by continued strong revenue growth and the Swedish krona's depreciation against the dollar. The company is valued in line with the richest valued companies in its peer group, corresponding to a material premium to the peer group average to reflect Cedar's considerably stronger growth rate. In relation to this average, the valuation normalizes materially twelve months out, courtesy of the company's strong outlook.

The fair value of Kinnevik's 14 percent shareholding in **Pleo** amounts to SEK 4,502m, down around 16 percent from last quarter's valuation, which in turn was 10 percent below where the company raised new financing at in the fourth quarter of 2021. The write-down reflects a largely unchanged premium to the peer group's more resilient quartile on an NTM revenue basis, which has contracted by around 40 percent in the quarter. Due to Pleo's significantly higher pace of growth than the peer group average, the write-down becomes more muted. The valuation still implies a significant premium to the peer group on an NTM basis, but normalizes over the coming 12 months in relation to the best-in-class companies in the peer group as Pleo is expected to grow at a significantly faster pace.

The fair value of Kinnevik's 15 percent shareholding in **TravelPerk** amounts to SEK 1,923m, effectively flat in dollar terms in the quarter but gaining 10 percent from a weakening Swedish krona. The assessed valuation is fairly in line with where the company raised new financing in late December 2021, and where smaller secondary transactions took place during the quarter, in which Kinnevik participated. The resilience of the carrying value of our TravelPerk investment reflects the company's superior performance benefiting from a sharp rebound in travel as well as continued strong acquisition of new clients more than offsetting an approximate 30 percent decline in the NTM revenue multiple during the first half of 2022.

CONSUMER FINANCE

Our Consumer Finance businesses are typically benchmarked against a peer set of digital wealth managers such as Avanza (AZA.ST) and Nordnet (SAVE.ST), and consumer-facing subscription businesses such as Match Group (MTCH) and Netflix (NFLX). On average, the companies in the broader composite peer set grew revenue by 40 percent in 2021 with gross margins above 50 percent, largely in line with our investments in the sector.

The fair value of Kinnevik's 13 percent shareholding in **Betterment** amounts to SEK 1,415m, effectively flat in the quarter in SEK terms. The peer group's average NTM revenue multiple contracted by nearly 30 percent in the second quarter and we continue to value Betterment at an unchanged approximate 10 percent premium to the peer group average in consideration of the company's stronger growth trajectory. Per the end of May, the company's assets under management amounted to around USD 32bn. While the revenue mix is becoming more diversified, Betterment's revenues are still primarily derived from fees on these assets under management and therefore remain in part correlated with the development of the US and global stock market. To reflect the drawdown in equity markets, our revenue outlook has been adjusted downwards by double-digit percentages relative to last quarter's forecast. At the current valuation level, the carrying value of our investment is positively affected by liquidation preferences, causing a more muted change in fair value relative to our underlying valuation of the business.

The fair value of Kinnevik's 6 percent shareholding in **Lunar** amounts to SEK 522m, down 35 percent in the quarter and from the valuation applied in a secondary transaction in the company during the first quarter. The peer group's average NTM revenue multiple contracted by around 25 percent in the quarter, and this contraction is reflected in our valuation. The valuation remains at a premium to peers on an NTM revenue multiple basis, but is within the peer group spread on a 2023 revenue basis due to the company's continued stronger growth rate relative to the peer group.

Note 6 Interest Bearing Assets and Liabilities

The net interest bearing assets amounted to SEK 13,766m and Kinnevik was in a net cash position of SEK 13,592m as at 30 June 2022. Kinnevik's total credit facilities (including issued bonds) amounted to SEK 8,630m as at 30 June 2022 whereof SEK 5,000m related to unutilised revolving credit facilities and SEK 3,500m related to bonds with maturity in 3-7 years.

During the first quarter, SEK 1,210m in outstanding corporate bonds fell due for payment and the Group's available liquidity, including short term investments and available unutilized credit facilities, totalled SEK 22.349m as at 30 June 2022 (SEK 15,869m as at 31 December 2021).

| SEK m | 30 Jun 2022 | 30Jun 2021 | 31 Dec 2021 |
|------------------------------------------------------------|----------------|---------------|----------------|
| Interest Bearing Assets | | | |
| Loans to investee companies | 71 | 130 | 137 |

| Total | 3 513 | 1 523 | 3 511 |
| Interest Bearing Short Term Liabilities | | | |
| Corporate bonds | - | 1 400 | 1 210 |
| Total | - | 1 400 | 1 210 |
| Total Interest Bearing Liabilities | 3 513 | 2 923 | 4 721 |
| Net interest bearing assets (+) / liabilities (-) | 13 907 | 3 887 | 6 175 |
| Debt, unpaid investments/divestments/dividends receivables | -141 | 563 | -471 |
| Net Interest Bearing Assets | 13 766 | 4 450 | 5 704 |
| Net Cash/(Net Debt) for the Group | 13 592 | 4 320 | 5 384 |

Kinnevik currently has no bank loans outstanding, and its bank facilities when drawn carry variable interest rates. Debt capital market financing consist of commercial paper and senior unsecured bonds. Commercial paper is issued with a maximum tenor of 12 months under Kinnevik's SEK 5bn commercial paper program, and senior unsecured bonds are issued with a minimum tenor of 12 months under Kinnevik's SEK 6bn medium term note program. In order to hedge interest rate risks, Kinnevik has entered into a number of interest rate swap agreements whereby it pays a fixed annual interest rate also on bonds with a floating rate coupon. The derivatives had a positive market value of SEK 251m at the end of the quarter and are marked to market based on discounted cash flows with observable market data. The derivatives are covered by ISDA agreement. As at 30 June 2022, the average interest rate for outstanding senior unsecured bonds amounted to 1.3 percent and the weighted average remaining tenor for all Kinnevik's credit facilities amounted to 2.7 years. The carrying amount of the liabilities is a reasonable approximation of fair value as they bear variable interest rates.

REVIEW REPORT

KINNEVIK AB (PUBL) CORPORATE IDENTITY NUMBER 556047-9742

INTRODUCTION

We have reviewed the condensed interim financial information (interim report) of Kinnevik AB (publ) as of 30 June 2022 and the six-month period then ended. The Board of Directors and the Managing Director are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

SCOPE OF REVIEW

We conducted our review in accordance with International Standard on Review Engagements ISRE 2410 Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and other generally accepted auditing practices and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, for the Group in accordance with IAS 34 and the Annual Accounts Act, and for the Parent Company in accordance with the Annual Accounts Act.

DEFINITIONS AND ALTERNATIVE PERFORMANCE MEASURES

Kinnevik applies the Esma Guidelines on Alternative Performance Measures (APM). An APM is a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework. For Kinnevik's consolidated accounts, this typically means IFRS.

APMs are disclosed when they complement performance measures defined by IFRS. The basis for disclosed APMs are that they are used by management to evaluate the financial performance and in so believed to give analysts and other stakeholders valuable information. Definitions of all APMs used are found below. Reconciliations of a selection of APMs can be found on Kinnevik's corporate website www.kinnevik.com.

AVERAGE REMAINING DURATION

The value weighted average number of years until maturity for all credit facilities including outstanding bonds

DEBT/EQUITY RATIO

Interest-bearing liabilities including interest-bearing provisions divided by shareholders' equity

DIVESTMENTS

All divestments in fixed listed and unlisted financial assets

EQUITY RATIO

Shareholders' equity as a percentage of total assets

GROSS CASH

Short-term investments, cash and cash equivalents and other interest-bearing receivables

GROSS DEBT

Interest-bearing liabilities including unpaid investments/divestments

INTERNAL RATE OF RETURN, IRR

The annual rate of return calculated in quarterly intervals on a SEK basis that renders a zero net present value of (i) fair values at the beginning and end of the respective measurement period, (ii) investments and divestments, and (iii) cash dividends and dividends in kind

INVESTMENTS

All investments in fixed listed and unlisted financial assets, including loans to portfolio companies

KINNEVIK MARKET CAPITALIZATION

Market value of all outstanding shares in Kinnevik at the end of the period

NET ASSET VALUE, NAV

Net value of all assets on the balance sheet, equal to the shareholders' equity

NET ASSET VALUE CHANGE

Change in net asset value without adjustment for dividend paid or other transactions with shareholders

NET ASSET VALUE PER SHARE, SEK

Total net asset value attributable to each share based on the number of shares outstanding at the end of the period

NET CASH/(NET DEBT)

Gross cash less gross debt

NET CASH/(NET DEBT) INCLUDING NET LOANS TO INVESTEE COMPANIES

Gross cash and net outstanding receivables relating to portfolio companies less gross debt

NET CASH TO PORTFOLIO VALUE/(LEVERAGE)

Net cash/(debt), excluding net loans to investee companies, as percentage of portfolio value

NET INVESTMENTS/(DIVESTMENTS)

The net of all investments and divestments in fixed listed and unlisted financial assets

NET PROFIT/(LOSS) PER SHARE BEFORE AND AFTER DILUTION, SEK

Net profit/(loss) for the period attributable to each share based on the average number of shares outstanding during the period before and after dilution

PORTFOLIO VALUE

Total book value of fixed financial assets held at fair value through profit or loss

TOTAL SHAREHOLDER RETURN, TSR

Annualized total return of the Kinnevik B share on the basis of shareholders reinvesting all cash dividends, dividends in kind, and mandatory share redemption proceeds into the Kinnevik B share, before tax, on each respective ex-dividend date. The value of Kinnevik B shares held at the end of the measurement period is divided by the price of the Kinnevik B share at the beginning of the period, and the resulting total return is then recalculated as an annual rate

Note: Net profit/loss per share before and after dilution is also a measurement defined by IFRS
